

ARCTIC GUARD

Guarding Against The Elements

PRETREAT
SURFACES BEFORE STORMS!

ARCTIC GUARD is the perfect granular ice melt for use on steps, sidewalks, driveways and parking lots. Easy to use with rotary or tailgate spreaders, this ice melt is ideal for areas where application rate and product control are crucial.

Created from a powerful combination of de-icing ingredients, each granule of **ARCTIC GUARD** contains sodium, calcium, magnesium, potassium and traces of 15 other minerals. This ice melt does not contain any unnatural additives and the natural pinkish color is achieved without using dyes.

When applied to snow and ice-covered surfaces, **ARCTIC GUARD** goes to work immediately penetrating the ice and snow deeply and staying on surfaces longer to help prevent accumulation and refreezing. This reduces the risk of over-application and the need to reapply as often, thus helping prevent damage to the soil structure, water table and developed property.

ARCTIC GUARD is an economical and effective ice melt even during the harshest of winter conditions. With a long shelf life, this product is the preferred choice for property managers looking for a cost-effective and eco-friendly solution.

PRODUCT SIZE	UNITS/PALLET
12 lb Arctic Guard Jug	160 jugs/pallet
25 lb Arctic Guard Bag	100 bags /pallet
50 lb Arctic Guard Bag	49 bags/pallet
2000 lb Arctic Guard Tote	1 tote/pallet

COST-EFFECTIVE

- Fast Acting
- Long Lasting
- Consistent Size
- Less Scatter & Bounce
- No Caking or Bridging
- Effective to 5°F

ECO-FRIENDLY

- Safer for Concrete
- Safer on Plants
- No PPE Required
- Safer Handling
- Gentle Effect on the Environment
- Non Tracking Formulation

ARCTIC GUARD is a natural ice melt that works better than most traditional ice melters with less of the risks.
