

StreetHeat Liquid Deicer

Corrigan Environmental Solution's lineup of liquid deicers provide a fast acting and cost effective alternative to road salt. **StreetHeat** liquid deicer is our most powerful alternative to granular deicing for both anti-icing and deicing applications. **StreetHeat** is formulated with boosted calcium chloride for fast acting results while preventing snow and ice from forming with minimal product used. **StreetHeat** is proven to be our most effective method to handling the toughest snow and ice build up when applied properly.

Features:

- Anti-Icing: It adheres to parking lot and sidewalk surfaces to form a membrane to prevent ice from forming under snowfall.
- Deicing: Once surfaces are plowed, it eliminates ice layers and possible re-freezing for minimal applications.

Benefits:

- Up to 3x faster results than rock salt
- Rated to keep working down to -14°F
- Boosted Calcium Chloride helps prevent re-freezing
- It's Lightfastness technology prevents "Tracking"
- Used to pre-wet rock salt minimizes usage up to 33%
- Use in multiple equipment applicators allows for flexibility on job sites

Composition:

- Calcium Chloride
- Sodium Chloride
- Magnesium Chloride
- Potassium Chloride
- Dye

Packaging:

- 265 Tote
- Bulk
