100% Granular Diatomite Absorbent

FLOOR-DRY

Absorb More With Less

- Made from a special grade of fresh-water DE, a naturally occurring mineral, with superior absorptive ability
- **♦** Absorbs liquid internally, allowing quick cleanup of water, oil, grease, water coolant, and much more
- ♦ Low density and high pore space allow more absorbency at a lighter weight
- ◆ Can use less product = less disposal of used material/cheaper costs
- Superior oil and lubricant absorbent
- ♦ Coarse granules offer less breakdown and better traction in areas where spills have been absorbed
- **♦** Great for high traffic areas
- **♦ Versatile for all non-aggressive fluid cleanup**
- **♦** Suitable for both home and commercial environments
- **♦ 100% Natural Mineral**
- **♦ NSF Registered**

FLOOR-DRY™ is perfect for a variety of applications...

- **♦** Automotive Businesses: retailers, dealers, repair garages, body shops
- ◆ Trucks and Heavy Equipment: truck stops, fuel islands, industrial warehouses
- **♦** Airports: general maintenance, ramp and fuel areas
- ♦ Farmhouse: livestock facilities, tractor fluid spills, shop operations
- **♦** Emergency Responders: fire and police departments, hazmat, traction in snow or ice
- **♦ Waste Management Companies**
- ♦ Home: concrete driveways, garage floors, bottom of garbage can to absorb moisture, paint spills

Part#	Weight	Bag Type	Pallet Configuration		Plant
9805	5 lb	Paper	Bags per Pallet: 400 Pallet Size: 40 x 48" Pallet Height: 70"		Fernley
9815	15 lb	Poly	Bags per Pallet: 133 Pallet Size: 40 x 48" Pallet Height: 72"		Fernley
9824 (Fernley) FD85-24QT (Clark)	24 qt (20 lb)	Poly	Bags per Pallet: 45 Pallet Size: 40 x 48" Pallet Height: 40"	Bags per Pallet: 75 Pallet Size: 40 x 48" Pallet Height: 60"	Fernley & Clark
9825 (Fernley) FD85 (Clark) FD85-H (Clark)*	25 lb	Poly *Poly + Handle	Bags per Pallet: 80 Pallet Size: 40 x 48" Pallet Height: 72"		Fernley & Clark
FD851000	1000 lb	Bulk	Bags per Pallet: 2		Clark

What is Diatomaceous Earth?

Mined in the western region of the US, diatomaceous earth (DE) consists of microscopic skeletal remains of unicellular plants (diatoms), deposited on lake beds & ocean floors, formed millions of years ago. Similar to a sponge, DE absorbs liquid internally through small pores. This unique mineral is thermally processed to make a broad range of powdered filter aids, functional additives, and granular absorbents.
